DETAILED ACTION

Response to Amendment

Amendment filed 12/16/05 has been entered and considered by the Examiner. Claims 23-25 have been canceled. Currently, claims 1-22 are pending in the instant application.

Election/Restrictions

Applicant's election with traverse of claims 1-22 in the reply filed on 12/16/05 is acknowledged. The traversal is on the grounds that an examination of two similar inventions does not constitute a serious burden on the Examiner. This is not found persuasive because even if the Applicant does not consider the examination a burden, the election-restriction is based on the two different inventions, namely, the device and the process for manufacturing. An examination of the device does not mean that the references used to reject it will automatically be used to reject the manufacturing process, since both inventions have different features of limitations. Thus, the serious burden on the Examiner of having to search all the features of limitations directed to different inventions and to reject each invention using different references is eliminated by the proper election of invention requirement. Moreover, when searching only the elected invention, there will not be a need to search for features not stated in the elected invention, thus resulting in a reduction of the workload and in a simplification of the prosecution of the application.

The requirement is still deemed proper and is therefore made FINAL.

DETAILED ACTION

Response to Amendment

Amendment filed 12/16/05 has been entered and considered by the Examiner. Claims 23-25 have been canceled. Currently, claims 1-22 are pending in the instant application.

Election/Restrictions

Applicant's election with traverse of claims 1-22 in the reply filed on 12/16/05 is acknowledged. The traversal is on the grounds that an examination of two similar inventions does not constitute a serious burden on the Examiner. This is not found persuasive because even if the Applicant does not consider the examination a burden, the election-restriction is based on the two different inventions, namely, the device and the process for manufacturing. An examination of the device does not mean that the references used to reject it will automatically be used to reject the manufacturing process, since both inventions have different features of limitations. Thus, the serious burden on the Examiner of having to search all the features of limitations directed to different inventions and to reject each invention using different references is eliminated by the proper election of invention requirement. Moreover, when searching only the elected invention, there will not be a need to search for features not stated in the elected invention, thus resulting in a reduction of the workload and in a simplification of the prosecution of the application.

The requirement is still deemed proper and is therefore made FINAL.

Application/Control Number: 10/760,524

Art Unit: 2879

A further restriction requirement is now listed.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, a method of fabricating a photocatalytic fluorescent lamp using an acid-type of anatase, see page 8, first full paragraph (see claim 2).

Species 2, a method of fabricating a photocatalytic fluorescent lamp using a base-type of anatase, see page 8, first full paragraph (see claim 3).

Species 3, a method of fabricating a photocatalytic fluorescent lamp by first mixing the chelating and Ti(OR) then adding water as described on page 8 lines 18-31 (see claim 4).

Species 4, a method of fabricating a photocatalytic fluorescent lamp by first mixing the chelating and water, then doping with Ti(OR) as described on page 8 lines 29-31 (see claim 5).

Species 5, a method of fabricating a photocatalytic fluorescent lamp, the step of coating the anatase TiO2 solution comprises coating the anatase TiO2 on the glass **before** the lamp is fabricated, see page 11 line 29 to page 12 line 8 (see claim 7).

Art Unit: 2879

Species 6, a method of fabricating a photocatalytic fluorescent lamp, the step of coating the anatase TiO2 solution comprises coating the anatase TiO2 on the glass *after* the lamp is fabricated, see page 12 lines 10-16 (see claim 6).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 8, and 9 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth A. Rielley whose telephone number is 571-272-2117. The examiner can normally be reached on Monday - Friday 7:30 - 4:00.

Art Unit: 2879

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimeshkumar Patel can be reached on 571-272-2457. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
